

Nicholas Wogan

SETI Institute & NASA Ames Research Center

Email: nicholaswogan@gmail.com or nicholas.f.wogan@nasa.gov

GitHub: <https://github.com/Nicholaswogan>

Date generated: June 9, 2026

Education & Work Experience

- 2025 - pres. Research Scientist, NASA Ames Research Center contracted via the SETI Institute, Moffett Field, CA.
- 2023 - 2025 NASA Postdoctoral Program Fellow, Space Science and Astrobiology Division, NASA Ames Research Center, Moffett Field, CA. Advisor: Natasha Batalha.
- 2017 - 2023 PhD Graduate Student, Dual-title Earth and Space Science and Astrobiology, University of Washington, Seattle, WA. Advisor: David Catling.
- 2012 - 2016 B.S., Physics major, University of Oregon Honors College, Eugene, OR.

Awards & Honors

- 2023 The David A. Johnston Award for Research Excellence, Earth and Space Science Department, University of Washington.
- 2023 NASA Postdoctoral Program Fellowship recipient
- 2023 Award for best graphic in presentation, Earth and Space Science Gala, University of Washington.
- 2017 Department of Earth and Space Sciences Top Scholar Award, University of Washington
- 2016 Undergraduate Research Award, University of Oregon Physics department
- 2016 Undergraduate Honors Thesis: Passed with Highest Distinction, University of Oregon Honors College

Mentoring, Teaching & Outreach

- 2024 - pres. Informally mentoring and collaborating with Conner Metz, a U-M graduate student, studying the photochemistry of sulfur on early Mars.
- 2024 - pres. Informally mentoring and collaborating with Sander Somers, a UMD graduate student, studying photochemical haze production in gas rich exoplanet atmospheres.
- 2024 - pres. Informally mentoring and collaborating with Samantha Gilbert, a UW graduate student, studying the coupled atmosphere-interior evolution of habitable rocky exoplanets.
- 2024 - pres. Informally mentoring and collaborating with John Herring, an ISU graduate student, studying the evolution of nitrogen on early Earth and rocky exoplanets.
- 2025 - pres. Mentoring Jaden Lopez, an undergraduate student at UCSC, through the Lamat Program. Jaden is studying gas opacities for the use of reflected light exoplanet spectroscopy.
- 2025 Mentored Elizabeth Pawelka, a post-baccalaureate researcher, through the NASA OSTEM program. Elizabeth studied sub-Neptune atmospheres in the context of the Habitable Worlds Observatory.

- 2024 - 2025 Informally mentored Sagnick Mukherjee, a former UCSC graduate student, on a first author article that studies photochemistry in hot gas giant atmospheres.
- 2024 - 2025 Informally mentored Jea Adams Redai, a Harvard graduate student, on a first author article publishing JWST observations of the rocky exoplanet GJ 357 b.
- 2024 Mentored Zoe Lu and Divya Bhamidipati, both high school students, through the NASA-Chabot internship program.
- 2022 - 2023 “Rockin’ Out” volunteer. Rockin’ Out is a K-12 volunteer-based outreach program at the Department of Earth and Space Sciences at the University of Washington.
- 2022 Presented at Astronomy on Tap, Seattle: “How Life Started and Where The Universe Will Go”
- 2019 Graduate Teaching Assistant: Intro. Astrobiology (ASTBIO 115; Winter), University of Washington.
- 2018 Teaching Assistant: Intro. Geology (ESS 101; Winter), University of Washington.

Peer-Reviewed Publications

Research and Observing Proposals Awarded

- 2025 - 2026 Title: "The First Set of Documentation and Tutorials for Any Photochemical Exoplanet Code"
PI: Nicholas Wogan
Program: NASA NNH24ZDA001N-SOSS:F.8 Supplements for Open-Source Science
Total budget: \$50,000
- 2025 - 2028 Title: "Exploring the Influence of Hazes on Climate and Spectra of Small Planets around FGK Stars"
PI: Ravi Kopparapu (NASA Goddard Spaceflight Center)
Program: NASA NNH24ZDA001N-HW:F.4 Habitable Worlds
Total budget: \$484,053
- 2025 - 2028 Title: "The Other Extreme: Enabling Characterization of Metal-poor Brown Dwarfs and testing our Understanding of Jupiter and Saturn"
PI: Sagnick Mukherjee (Arizona State University)
Program: JWST cycle 4 GO, Exoplanets and Exoplanet Formation
Total budget: Not yet allocated.
- 2025 - 2028 Title: "Cliff Hangers: Testing for Atmosphere-Mantle Interactions in Radius Cliff Planets"
PI: Natasha Batalha
Program: JWST cycle 4 GO, Exoplanets and Exoplanet Formation
Total budget: Not yet allocated.

Selected Presentations

Invited

- 2025 **Nicholas Wogan**. The photochemistry and climate of foreign atmospheres: Implications for the origin of life on early earth and understanding exoplanets observed by the James Webb Space Telescope. Planetary Science Seminar, California Institute of Technology.
- 2024 **Nicholas Wogan**. Workshop on the `Photochem` code for simulating exoplanet atmospheres. Theoretical Astrophysics Program Planet Formation Initiative Lectureship, University of Arizona.
- 2024 **Nicholas Wogan**. Assessing exoplanet habitability with JWST and the Habitable Worlds Observatory: from the sub-Neptune K2-18b to rocky Earth-like planets. Planetary lunch, University of California Santa Cruz.
- 2024 **Nicholas Wogan**. The photochemistry of hydrogen-rich atmospheres: From the origin of life on Earth to biosignatures on the K2-18b exoplanet. Institute for Geo-

- physics and Planetary Physics seminar, University of California Santa Cruz.
- 2022 **Nicholas Wogan**, David Catling, Kevin Zahnle, and Mark Claire. Rapid timescale for an oxic transition during the Great Oxidation Event and the instability of low atmospheric O₂. NASA Goddard Exoplanets Seminar.
- 2020 **Nicholas Wogan** and David Catling. Atmospheric synthesis of prebiotic molecules on the Hadean Earth. Prebiotic Chemistry and Early Earth Environments Consortium (PCE3), remote conference.
- Contributed
- 2025 **Nicholas Wogan**, Natasha Batalha, Kevin Zahnle, Joshua Krissansen-Totton. Towards a universal chemical and climate model of planetary atmospheres for interpreting HWO observations. Towards the Habitable Worlds Observatory: Visionary Science and Transformational Technology, Washington, D.C.
- 2025 **Nicholas Wogan**, Natasha Batalha, Kevin Zahnle, Joshua Krissansen-Totton. Towards a general chemical and climate model of planetary atmospheres for interpreting exoplanet observations. Exoclines, Montreal, Canada.
- 2025 **Nicholas Wogan**, Natasha Batalha, Joshua Krissansen-Totton, Kevin Zahnle. On inferring the surface production rate of biogenic gases on rocky exoplanets from telescope spectra. American Astronomical Society Meeting, National Harbor, MD.
- 2024 **Nicholas Wogan**, Natasha Batalha, Joshua Krissansen-Totton, Kevin Zahnle. A self-consistent photochemical-climate-flux retrieval method for exoplanet characterization and life detection. American Geophysical Union Fall Meeting, Washington, D.C.
- 2024 **Nicholas Wogan**, Natasha Batalha, Kevin Zahnle, Joshua Krissansen-Totton, Shang-Min Tsai and Renyu Hu. JWST observations of K2-18b can be explained by a gas-rich mini-Neptune with no habitable surface. AbSciCon, Providence, RI.
- 2024 **Nicholas Wogan**, Natasha Batalha, Kevin Zahnle, Joshua Krissansen-Totton and Shang-Min Tsai. JWST observations of K2-18b can be explained by a gas-rich mini-Neptune composition. Extreme Solar Systems V, Christchurch, New Zealand.
- 2023 **Nicholas Wogan**, David Catling, Kevin Zahnle, and Roxana Lupu. Origin of life molecules in the atmosphere after big impacts on the early Earth. American Geophysical Union Fall Meeting, San Francisco, CA.
- 2023 **Nicholas Wogan**, Shawn Domagal-Goldman, Chris Stark, Aki Roberge, Giada Arney, Tyler Robinson. Detecting exo-Earths with the Habitable Worlds Observatory. Habitable Worlds Observatory Conference, Baltimore, MD.
- 2023 **Nicholas Wogan**, David Catling, Kevin Zahnle, and Mark Claire. Rapid timescale for an oxic transition during the Great Oxidation Event and the instability of low atmospheric O₂. Green Bank Astrobiology Conference, Green Bank, WV.
- 2022 **Nicholas Wogan**, David Catling and Kevin Zahnle. Atmospheric nitriles for the origin of life from the atmosphere after large asteroid impacts on the Hadean Earth. Latsis Conference, Zurich, Switzerland.
- 2022 **Nicholas Wogan**, David Catling and Kevin Zahnle. Origin of life chemistry in the atmosphere after large impacts on the early Earth. Astrobiology Science Conference, Atlanta, GA.

- 2021 **Nicholas Wogan**, David Catling and Kevin Zahnle. Molecules for the origin of life from impact-generated atmospheres on early Earth. Simons Foundation Collaboration on the Origin of Life Annual meeting, remote conference.
- 2021 **Nicholas Wogan**, David Catling and Kevin Zahnle. Molecules for the origin of life from impact-generated atmospheres on early Earth. Goldschmidt, remote conference.
- 2019 **Nicholas Wogan** and David Catling. When is chemical disequilibrium in Earth-like planetary atmospheres a biosignature versus an anti-biosignature? Investigating disequilibria from prebiotic to post-biotic worlds. American Geophysical Union Fall Meeting, San Francisco, CA.
